

# HARPER ADAMS UNIVERSITY

## Programme Specification

1	Awarding Institution:	Harper Adams University
2	Teaching Institution:	Askham Bryan College
3	Course Accredited by:	Not applicable
4	Final Award and Level:	BSc / BSc (Hons) (top-up) Level 6
5	Interim Award(s) and Level(s):	BSc (Level 6)
6	Award Title:	Animal Management with Science
7	UCAS Code:	D300
8	HECoS and CAH2 Group(s):	100518 - Animal Management 40% 100523 – Animal Science 30% 100356 – Zoology 30%  CAH06-01-03 CAH06-01-01 CAH06-01-06
9	QAA Benchmark Statement(s):	Agriculture re, Horticulture, Forestry, Food, Nutrition and Consumer Sciences Biosciences (2019) Earth sciences, environmental sciences and environmental studies (2022)
10	Language of Study:	English
11	Mode of Study:	Full-Time/Part -Time
12	Course Duration:	See section below
13	Date Approved or Revised:	Validation Event held on 3 <sup>rd</sup> May 2023 Revised Programme Approvals Committee – 16 <sup>th</sup> July 2024 and 24 <sup>th</sup> September 2024 ( <b><u>Applicable to 2024-25 and 2025-26 Entry Cohorts</u></b> ) (September 2023 – August 2029)

### CONTEXT AND RATIONALE

The BSc Animal Management Top Up has been successfully running at University Centre Askham Bryan (UCAB) for the last fifteen years. However, numbers have been steadily decreasing. This is due to the more specialist top up degrees now on offer at UCAB. The course has therefore been updated to meet current student needs and provide a progression route from the new FdSc Animal Science with Management course.

The course is designed to develop in each student a broad understanding and range of skills required for the animal management industry, with students able to choose options to best suit their career aspirations. These skills are pertinent in all animal related industries.

### **Securing the Skills Needed by our Industries and Professions**

All of our proposed programmes are developed following consultation with the Technical Advisory Group (TAG). With a strong practical element to the programme skills for employment are integrated to the programmes:

### **Working with New Technologies**

The programmes will encompass aspects of digital and innovation in teaching and learning, supported and enabled by the staff within the UCAB Digital Skills Academy.

### **Turning the Climate Change Debate into Action**

The programmes will look at sustainability of the relevant industries and sustainable development within these industries.

Askham Bryan is committed to environmental sustainability and carbon reduction and to adopting appropriate measures to support the Government's net zero emission by 2050 target as set out in the change Act of 2008 (Askham Bryan Sustainability Statement 2022-2023).

### **Informing Consumer Views about Food, Animal Wellbeing and the Environment**

The institution recognises that in order to bring about a positive change to the sustainability agenda and environmental enhancement, there is a need to look at organisational, personal and community behaviour to facilitate changes in business practices, and ensure individuals make personal decisions that support a healthy environment, for now and the future generations.

### **Contributing to UK Economic Prosperity**

Animal health, welfare and science is an area of growth for the UK economy with a need for sustainability and self-sufficiency Askham Bryan College HE programmes contribute to this through the meaningful integration of the Education for Sustainable Development Goals. These goals are mapped to both the programmes and the modules to ensure that students are developing an applied knowledge of environmental, social and economic sustainability which in turn contributes to the UK economic prosperity.

## **GENERIC AIMS**

All BSc/BSc (Hons) awards aim to provide the following:

- 1) To develop in each student subject knowledge and understanding appropriate to individual interests and developing vocational needs.
- 2) To develop each student's intellectual powers, their understanding and judgement, their ability to see relationships within what they have learned and to examine the field of study in a broader perspective.
- 3) To develop the personal effectiveness and employability of students, in particular their ability to learn, to communicate, to work with others and to solve problems.
- 4) To develop those skills of professional scholarship required for career management, lifelong learning and innovation.
- 5) To inculcate an awareness of the wider consequences of economic activity and a determination to minimise harmful effects on the environment and on people.
- 6) To provide a lively, stimulating and challenging educational experience.

## AWARD-SPECIFIC AIMS

The BSc/BSc (Hons) Animal Management with Science (top-up) award aims to provide the following:

- 1) To develop in each student an understanding of biological, environmental and welfare needs of animals and how to monitor and manage systems to meet these needs.
- 2) To develop an understanding in students about animal husbandry health and nutrition for both domestic and exotic species.
- 3) To develop in students an appreciation of the complexity and diversity of life processes in animals at molecular, cellular and physiological level.
- 4) To develop an understanding of the principles of animal genetics and evolution and the interaction between animals and their environment.
- 5) To develop students' research skills to allow them to generate realistic and imaginative research projects related to their studies whilst applying methods to solve routine problems relevant to the course, with some awareness of appropriate controls, possible bias, ethics and sustainability.
- 6) To develop communication and management skills and the ability to apply them to problems associated with captive and wild animal management.
- 7) To enable the students to explain and evaluate the contribution of Biosciences to solving interdisciplinary challenges and the role of interdisciplinary thinking in solving scientific problems.

## GENERIC OUTCOMES

On successful completion of BSc/BSc (Hons) Animal Management with Science (top-up) award, students will be able to:

A	Knowledge	Demonstrate a detailed and specialised knowledge of a range of theories, ideas, terminology and contexts associated with the discipline, with a clear appreciation of the ways in which knowledge is developed and the provisional nature of knowledge.
B	Problem Solve	Select, devise and evaluate the use of appropriate strategies to solve complex, unpredictable, ambiguous and real-world problems.
C	Analysis	Analyse complex data using appropriately selected techniques; draw out robust findings in this process; and, thoroughly evaluate the effectiveness of the analytical strategy.
D	Synthesis	Select and combine ideas and/or data to generate meaningful and convincing composite evidence or arguments with a clear purpose.
E	Evaluation	Review complex and unpredictable information to address unpredictable, ambiguous or real-world problems, with a good awareness of the limitations of both the material under review and the analytical approach.
F	Digital Competence	Select, use and evaluate technologies to enable or enhance the performance of specific tasks, and appreciate the evolution of technology in their discipline.
G	Team Work	Work effectively with others, with minimal or no supervision, to achieve positive outcomes; demonstrate leadership and management capabilities within a team situation; and, critically assess their personal contribution to the team.
H	Career Dev	Recognise, pursue, record and reflect on personal development to pursue personal career goals and appreciate the changing nature of the workplace and the need for personal resilience and <b>lifelong learning</b> .
I	Communications	Communicate effectively and professionally for a range of different purposes and through different modes, with consideration of audience needs as well as other contextual factors such as commercial sensitivity, impact maximisation and accessibility requirements.
J	Practical Comp	Perform practical operations in complex, unpredictable, real-world situations that require the selection of combined or novel practical skills and critically review personal effectiveness in practical tasks with reference to relevant professional standards.
K	Autonomy	Act independently and autonomously with minimum supervision in academic and practical tasks.

L	Research	Select and use research to inform the development of knowledge and understanding, and to inform decision-making.
M	Sustain Practice	Evaluate the sustainability of practices, processes or developments, with attention to different stakeholder perspectives, unintended consequences, economic and social dimensions, or environmental considerations.
N	Global	Compare and contrast international examples or case studies that are associated with the discipline and work with an active awareness of global factors or trends that have an impact on specific areas of study.
O	Ethics	Locate a range of ethical issues associated with their own research or professional behaviours, and demonstrate personal responsibility for ethical choices, including adherence to professional codes in complex ethical dilemmas.
P	Placement	Not applicable
Q	Honours	Effectively plan and undertake research.

## AWARD-SPECIFIC OUTCOMES

On successful completion of the BSc/BSc (Hons) Animal Management with Science (top-up) award, students will be able to:

(R) To develop each students ability to apply detailed scientific knowledge to the management of animals.

(S) To equip students with a thorough understanding of business concepts and stakeholder requirements relating to management of animals.

(T) To develop in students the ability to identify, analyse and solve a range of commonly encountered problems when managing animals and, where appropriate, indicate solutions that apply to industrial practice.

(U) To develop the students' ability to identify and evaluate external factors and their influence on the development of the animal management sector.

(V) To provide knowledge of experimental, statistical and computing techniques to generate a realistic and imaginative research project using a range of knowledge from a chosen area.

## RELATIONSHIP WITH EXTERNAL REFERENCE POINT(S)

The aims and outcomes of this Honours Degree programme reflect the level descriptors for higher education qualifications, part of the QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014).

The award is reflected in the benchmark statements for Agriculture, Horticulture, Forestry, Food, Nutrition and Consumer Sciences (2019) and Biosciences (2023) as well as Earth Sciences, Environmental Sciences and Environmental Studies (2022). In addition, the themes of sustainability and globalisation are embedded.

The College holds a regular Technical Advisory Group and feedback from employers help to shape the curriculum from an industry perspective.

## PROFESSIONAL ACCREDITATION ARRANGEMENTS

Not applicable.

## **COURSE PROGRESSION, MODULE COMPENSATION, TRANSFER, ADVANCED STANDING AND INTERIM AWARDS**

### **Course Duration**

The full-time programme will be completed in one year, with the academic year consisting of two semesters, each typically of 12 weeks duration, in addition to directed study weeks and examination periods.

The part-time programme will be completed in two years and typically be no less than 50% of the standard module diet of the full-time version of the award.

The maximum period of registration is two years beyond the expected course duration, to allow for periods of approved postponement or repeat study.

### **Progression**

Students who successfully complete the programme may be eligible to go on to study the following programmes:

- MSc Applied Animal Behaviour and Welfare
- MSc Zoo Management and Conservation

### **Module Compensation Exclusions**

The following modules are not eligible for compensation within the BSc (Hons) Animal Management with Science (top-up) programme:

Part 1 modules: Research Project.

The following modules are not eligible for compensation within the BSc Animal Management with Science (top-up) programme:

Part 1 modules: Sustainable Development in the Animal Industry.

### **Transfer**

BSc (Hons) Top Up

For an Ordinary Degree BSc Animal Management with Science (top-up) candidate to progress to Honours Degree they must have completed a minimum of 80 credits after re-assessment at Level 6 and achieved a mean grade of >55%.

### **Entry with Advanced Standing**

Table 4.1 in **Section 4** of the *Academic Quality Assurance Manual* identifies the maximum credit that can normally be advanced for students wishing to enter with advanced standing from a Harper Adams' award, or an award from another institution.

The course structure diagram(s) identify the specific study programme(s) for candidates entering with advanced standing. **Section 4.5.12** of the *Academic Quality Assurance Manual* specifies the arrangements for transfer and advanced entry and these will apply unless an alternative arrangement has been approved.

## Interim Awards

The requirements for interim awards associated with final awards are as follows:

### BSc Animal Management with Science (top-up)

The outcomes required for the ordinary award are:

A	Knowledge	Demonstrate a detailed and specialised knowledge of a range of theories, ideas, terminology and contexts associated with the discipline, with a clear appreciation of the ways in which knowledge is developed and the provisional nature of knowledge.
B	Problem Solve	Select, devise and evaluate the use of appropriate strategies to solve complex, unpredictable, ambiguous and real-world problems.
C	Analysis	Analyse complex data using appropriately selected techniques; draw out robust findings in this process; and, thoroughly evaluate the effectiveness of the analytical strategy.
D	Synthesis	Select and combine ideas and/or data to generate meaningful and convincing composite evidence or arguments with a clear purpose.
E	Evaluation	Review complex and unpredictable information to address unpredictable, ambiguous or real-world problems, with a good awareness of the limitations of both the material under review and the analytical approach.
F	Digital Competence	Select, use and evaluate technologies to enable or enhance the performance of specific tasks, and appreciate the evolution of technology in their discipline.
G	Team Work	Work effectively with others, with minimal or no supervision, to achieve positive outcomes; demonstrate leadership and management capabilities within a team situation; and, critically assess their personal contribution to the team.
H	Career Dev	Recognise, pursue, record and reflect on personal development to pursue personal career goals and appreciate the changing nature of the workplace and the need for personal resilience and <b>lifelong learning</b> .
I	Communications	Communicate effectively and professionally for a range of different purposes and through different modes, with consideration of audience needs as well as other contextual factors such as commercial sensitivity, impact maximisation and accessibility requirements.
J	Practical Comp	Perform practical operations in complex, unpredictable, real-world situations that require the selection of combined or novel practical skills and critically review personal effectiveness in practical tasks with reference to relevant professional standards.
K	Autonomy	Act independently and autonomously with minimum supervision in academic and practical tasks.
L	Research	Select and use research to inform the development of knowledge and understanding, and to inform decision-making.
M	Sustain Practice	Evaluate the sustainability of practices, processes or developments, with attention to different stakeholder perspectives, unintended consequences, economic and social dimensions, or environmental considerations.
N	Global	Compare and contrast international examples or case studies that are associated with the discipline and work with an active awareness of global factors or trends that have an impact on specific areas of study.
O	Ethics	Locate a range of ethical issues associated with their own research or professional behaviours, and demonstrate personal responsibility for ethical choices, including adherence to professional codes in complex ethical dilemmas.
P	Placement	Not applicable

### Award Specific Outcomes:

(R) To develop each students ability to apply detailed scientific knowledge to the management of animals.

(S) To equip students with a thorough understanding of business concepts and stakeholder requirements relating to management of animals.

(T) To develop in students the ability to identify, analyse and solve a range of commonly encountered problems when managing animals and, where appropriate, indicate solutions that apply to industrial practice.

(U) To develop the students' ability to identify and evaluate external factors and their influence on the development of the animal management sector.

(V) To provide knowledge of experimental, statistical and computing techniques to generate a realistic and imaginative research project using a range of knowledge from a chosen area.

Students will have obtained a minimum of 80 credits at level 6. This will normally include a pass in the following modules:

Sustainable Development in the Animal Industry  
Recent Advances in Animal Management  
Enclosure Design and Stock Management  
Marine Conservation (elective)  
Wildlife Disease and Population Management (elective)  
Zoo Management (elective)

Entry with Accreditation of Prior Learning (APL)/ Accreditation of Prior Experiential Learning (APEL) will be accepted in accordance with the Askham Bryan College procedure and Harper Adams University regulations. No more than  $\frac{2}{3}$  credit for the award may be derived from APL. Within this limit, no more than half of the total credit value of the award may be derived from APEL.

Holders of Foundation Degree awards will typically already have 120 credits at level 4 plus 120 credits at level 5.

## **COURSE STRUCTURE, LEVELS AND CREDIT REQUIREMENTS FOR INTERIM AND FINAL AWARDS**

Harper Adams' programmes are based on a credit-accumulation system where 1 credit represents 10 notional hours of student study time. Modules are normally 20 credits or multiples thereof. Modules are also at different levels from Levels 3 – 7, according to their intellectual challenge. Courses leading to specific awards include **core modules, optional modules** from which students must select choices up to the number of credits required.

The minimum credit requirements needed to progress to interim and final awards are listed in **Section 4.4.5** of the *Academic Quality Assurance Manual*. These are reflected in the corresponding course structure study programmes, which follow.

Year 1			
All at level 6 unless indicated			
CORE			
Semester 1		Semester 2	
Research Project ABC6200			40
Enclosure Design and Stock Management ABA6225			20
Sustainable Development in the Animal Industry ABA6233	20	Recent Advances in Animal Management ABA6230	20
ELECTIVES			
Choose one module			
Wildlife Disease and Population Management ABA6234	20	Zoo Management ABA6235	20
		Marine Conservation ABA6227	20

Year 1			
All at level 6 unless indicated			
CORE			
Semester 1		Semester 2	
Enclosure Design and Stock Management ABA6225			20
Sustainable Development in the Animal Industry ABA6233	20	Recent Advances in Animal Management ABA6230	20
ELECTIVES			
Choose one module			
Wildlife Disease and Population Management ABA6234	20	Zoo Management ABA6235	20
		Marine Conservation ABA6227	20

Full-time Honours students will normally study at least 120 credits (equivalent to 1200 study hours) per year from a combination of core (compulsory) and elective modules. Pass Degree students would normally study the Sustainable Development in the Animal Industry as an alternative to the Research Project.

Validation Date: 3<sup>rd</sup> May 2023

Date of Approval following Response to Validation Report: July 2023

Period of Approval: September 2023 – August 2029

## **COURSE DESIGN, LEARNING, TEACHING AND ASSESSMENT METHODS**

### **Assessment philosophy**

Assessments will vary to reflect the academic, technological, practical and professional skills development of students on the BSc/BSc (Hons) Animal Management with Science (top-up) programme.

### **Learning and teaching methods**

Teaching and learning methods used to deliver this curriculum are designed to provide experience, and, through reflection upon it, develop concepts which can then be explored through testing and experimentation. Methods vary according to the nature of each module's subject matter but include a wide diversity from more formal lectures to student centred activities including assignments, seminars, field trips, guest lectures and case studies. Practical skills will be developed during sessions in the animal unit, on field trips and in laboratories.

All students carry out an element of research in the final year. The curriculum is delivered in such a way that there is a reducing reliance on tutor-directed study as students progress through their programme. Students will be supported with their study via the college's virtual learning environment (VLE) which will prepare them for the autonomy expected of HE students and for Continuing Professional Development studies, post-graduation.

### **Transferable skills**

Modules are designed to develop the skills required to succeed on college courses, to obtain employment, to manage careers and to develop the scholarship required in a learning society. The programme includes activities to develop core skills of communication, numeracy, IT and personal development planning. Higher level modules are designed to develop teamwork, independent learning, problem solving and research.

### **Typical assessment**

Assessment is considered an important part of the learning process. Modules are assessed in one, two or three pieces of assessment. Each assessment will provide summative feedback for the learning outcomes in the module. The contribution of each assessment to the end overall mark is indicated in the module descriptors. There is no threshold requirement in any assessment component. Formative assessments will not be graded. Unless otherwise specified in module descriptors the overall mark is derived from a weighted mean, with no threshold requirement in any assessment component. A range of subject specific assessment methodologies will be included to develop practical and technical skills. These will include professional discussion, peer observation, case studies and practical assessments.

## **ENTRANCE REQUIREMENTS**

For admission onto the Honours Degree programme, students must have achieved an overall pass in their Foundation Degree/HND.

In addition, places are dependent on a reference from the student's Foundation Degree/HND Course Manager reflecting their suitability for Level 6 study. Some applicants may be interviewed. Applications will be welcomed via one of the formalised pathways outlined in signed progression accords with other institutions.

## Curriculum Map for BSc/BSc (Hons) Animal Management with Science (top-up) (Level 6)

Award Outcomes	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V

A	Knowledge	Demonstrate a detailed and specialised knowledge of a range of theories, ideas, terminology and contexts associated with the discipline, with a clear appreciation of the ways in which knowledge is developed and the provisional nature of knowledge.
B	Problem Solve	Select, devise and evaluate the use of appropriate strategies to solve complex, unpredictable, ambiguous and real-world problems.
C	Analysis	Analyse complex data using appropriately selected techniques; draw out robust findings in this process; and, thoroughly evaluate the effectiveness of the analytical strategy.
D	Synthesis	Select and combine ideas and/or data to generate meaningful and convincing composite evidence or arguments with a clear purpose.
E	Evaluation	Review complex and unpredictable information to address unpredictable, ambiguous or real-world problems, with a good awareness of the limitations of both the material under review and the analytical approach.
F	Digital Competence	Select, use and evaluate technologies to enable or enhance the performance of specific tasks, and appreciate the evolution of technology in their discipline.
G	Team Work	Work effectively with others, with minimal or no supervision, to achieve positive outcomes; demonstrate leadership and management capabilities within a team situation; and, critically assess their personal contribution to the team.
H	Career Dev	Recognise, pursue, record and reflect on personal development to pursue personal career goals and appreciate the changing nature of the workplace and the need for personal resilience and <b>lifelong learning</b> .
I	Communications	Communicate effectively and professionally for a range of different purposes and through different modes, with consideration of audience needs as well as other contextual factors such as commercial sensitivity, impact maximisation and accessibility requirements.
J	Practical Comp	Perform practical operations in complex, unpredictable, real-world situations that require the selection of combined or novel practical skills and critically review personal effectiveness in practical tasks with reference to relevant professional standards.
K	Autonomy	Act independently and autonomously with minimum supervision in academic and practical tasks.
L	Research	Select and use research to inform the development of knowledge and understanding, and to inform decision-making.
M	Sustain Practice	Evaluate the sustainability of practices, processes or developments, with attention to different stakeholder perspectives, unintended consequences, economic and social dimensions, or environmental considerations.
N	Global	Compare and contrast international examples or case studies that are associated with the discipline and work with an active awareness of global factors or trends that have an impact on specific areas of study.
O	Ethics	Locate a range of ethical issues associated with their own research or professional behaviours, and demonstrate personal responsibility for ethical choices, including adherence to professional codes in complex ethical dilemmas.
P	Placement	Not applicable
Q	Honours	Effectively plan and undertake research.
R		Critically evaluate key scientific principles and apply knowledge to situations relating to the husbandry, behaviour and health of animals and the environment
S		Evaluate key scientific principles and apply knowledge to situations relating to the husbandry, behaviour and health of animals and the environment
T		Appraise external factors and their potential influence on the animal management.
U		Appreciate the scientific, societal, and environmental influences on animal science and be prepared to work within ethical and professional boundaries.
V		Display the attributes, behaviour and attitudes required in working life.
