

PPE requirements for Level 3 Arboriculture

Chainsaw Trousers

Type C (all round protection) and Class 1 as a minimum.

We suggest that Class 1 is suitable as they offer the protection required and are lighted and cheaper than other classes. **These trousers must be Type C**

Chainsaw Gloves

Class 0 as a minimum

Chainsaw Boots

Class 1 as a minimum

Helmet

A climbing helmet is essential as this will cover the ground and aerial tree work. A visor and ear protection is also required.

Please remember to try the trousers and boots before you buy them. Some of the boot sizes can be a little different to usual every day footwear.

College climbing equipment will be used during the aerial tree work, if you already have your own climbing equipment and want to use it, a LOLER certificate must be produced.

Lab Coat

Lab coats should be brought as working in laboratories for your science lessons. Hygiene has always been of the highest importance, even more so now.

Personal First Aid kit

The first aid kit must contain a large wound dressing to treat serious bleeding, and should contain eye wash, disposable gloves, and equipment to treat minor cuts.
